

GAC offers Analog Auto Synchronizers and Load sharers for parallel operation of multiple gensets. "SYNC CHECK" function available, which can activate a relay to connect generator to main bus.

Major Features:

- Fast & Reliable Synchronizing of Volt, Phase & Hz.
- Accurate & Proportional load sharing (+/-2 KW).
- Isochronous or Droop load Sharing.
- Reverse Power protection.
- Power management Load dependent START/STOP.
- SYNC CHECK function inbuilt.
- Load anticipation feature better transient response.
- Suitable for all makes of Electronic Governors.
- Mains power control with Ramp, load ramping.
- High voltage isolation with low Power consumption.

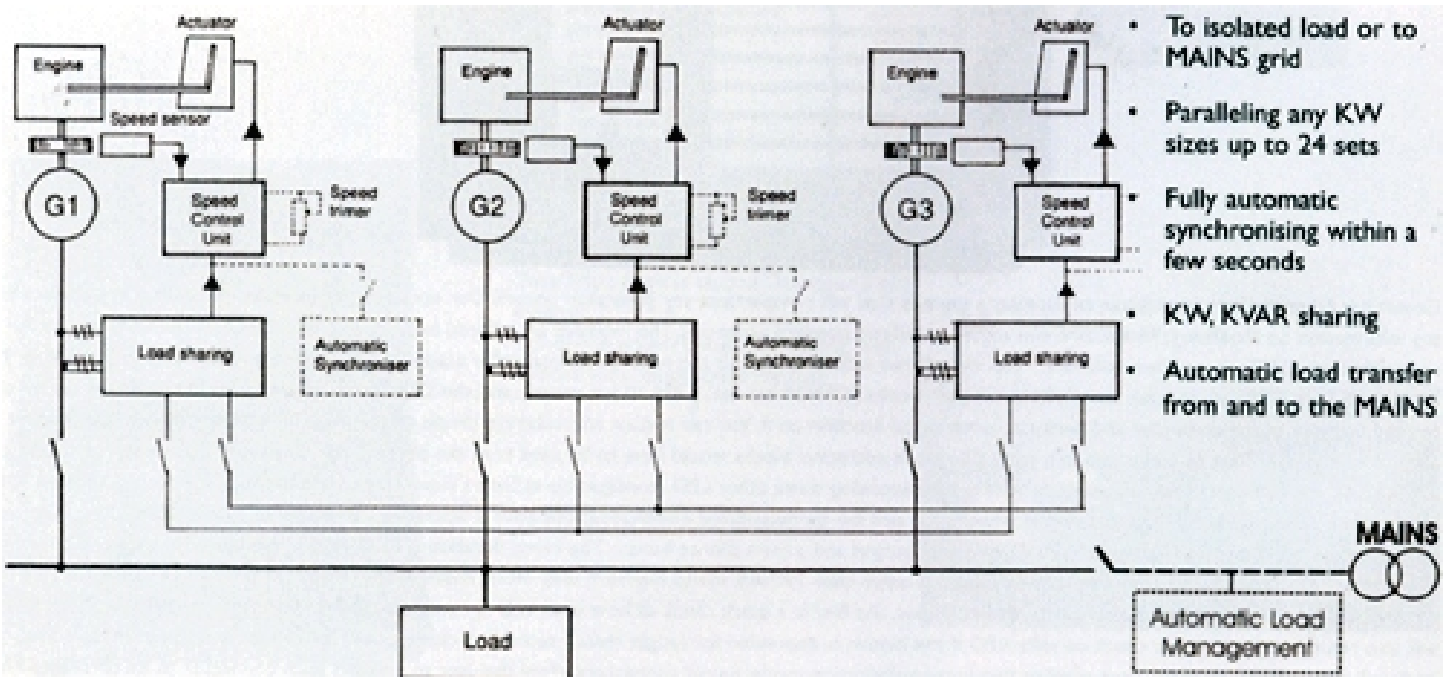

**Synchronizer Type
SYC 6714**

**Load Sharer Type
LSM 672**

Applications:

MADHURA INTERNATIONAL

A-202 Trade Towers, International Convention Centre (ICC), Senapati Bapat Road,
Pune 411016 (India). Tel.: +91 20 25632783, 25638494
